

~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

-----  
PROJECT NUMBER: 0157

SESSION NUMBER: 1

DATE OF SESSION: 26 MAY 88

DATE OF REPORT: 26 MAY 88

START: 0905

END: 0955

METHODOLOGY: CRV

VIEWER IDENTIFIER: 025  
-----

1. (S/NF/SK) MISSION: Initial Stage 2 session. Site was Titan, the largest moon of Saturn.

2. (S/NF/SK) VIEWER TASKING: Coordinates 0157/3914.

3. (S/NF/SK) COMMENTS: Initially, 025 maintained an acceptable degree of structure, but this began to fall apart midway into the session. This is understandable, however, since at the beginning of each stage the "noise level" is predictably high.

Problems: 1) 025 still has a tendency to call an analytical B component prematurely and, therefore, sometimes incorrectly. For example, the habit persists of calling all liquids "water".

2) 025 must learn how to control the flow of Stage 2 data so as not to become overwhelmed by it. 3) AOL's must be called and objectified! These problems were brought to 025's attention; they should begin to disappear soon.

Note: 025 has expressed the desired to learn via "exploring and making mistakes", vs tight monitor guidance/control. As long as 025 does not continue to repeat the same mistakes and progresses at a normal pace through each stage of training, this program is generally acceptable to the monitor.

4. (S/NF/SK) EVALUATION: [3].
